

# SEAoNY

## STRUCTURAL ENGINEERS ASSOCIATION OF NEW YORK

As concrete buildings continue to become bigger and more complex and the usage of threaded bars for reinforcement in concrete is increasing, SEAoNY will be hosting this seminar to cover the basic features of threaded bars and their usage in concrete building structures. The importance of understanding the unique features of the threaded bars will help in maximizing the benefits of their use as reinforcement in concrete structures.

**DATE:** Wednesday, February 28<sup>th</sup>, 2017

**PRESENTERS:** *Steven Bongiorno*

**LOCATION:** Center for Architecture  
536 LaGuardia Place  
New York, NY 10012
