Structural Engineers Association of New York

With the increased economic and social losses associated with recent severe weather conditions, the topic of resiliency has become increasingly popular. What can we expect for future flood events? Can we guard against such impending damages?

This day-long seminar will provide attendees with the tools necessary to respond to the need for flood resilient infrastructure. Please join us as industry experts provide knowledge on flood mitigation.

Topics Covered

- Evaluation and Assessment
- Codes and Requirements
- NYC Building Code
- Special Inspections
- New Design
- Existing Retrofit
- Foundations
- Architectural Considerations
- Products and Manufacturers
