Navigating Today’s Workplace for Employers and Employees

SESSION TWO: THE HARD SKILL OF COMMUNICATION

Session Two of this series will examine contemporary challenges and opportunities to leverage communication to improve retention, workplace satisfaction and the quality, efficiency, and value ascribed to our work both by discipline and for the AEC industry as a whole.

Panelists will provide a brief introduction to their experience and specialty, and then share example case studies from their experience where the importance of communication has been highlighted; examples will include positive outcome by way of talent in communication as well as pitfalls and negative results connected to a failure in communication. Case Studies will examine verbal, written, and visual modes of communication related to project delivery, in-office management, collaboration with other disciplines, legal ramifications, etc. Attendees will be invited to interact with panelists as case studies are examined via question and answer.
